What is the role of the Supergen ORE Hub in providing research leadership for ORE to achieve targets for 2030, 2050 and beyond?

Dr Isabella Panovic, EPSRC Senior Portfolio Manager –Energy & Decarbonisation
29th September 2022

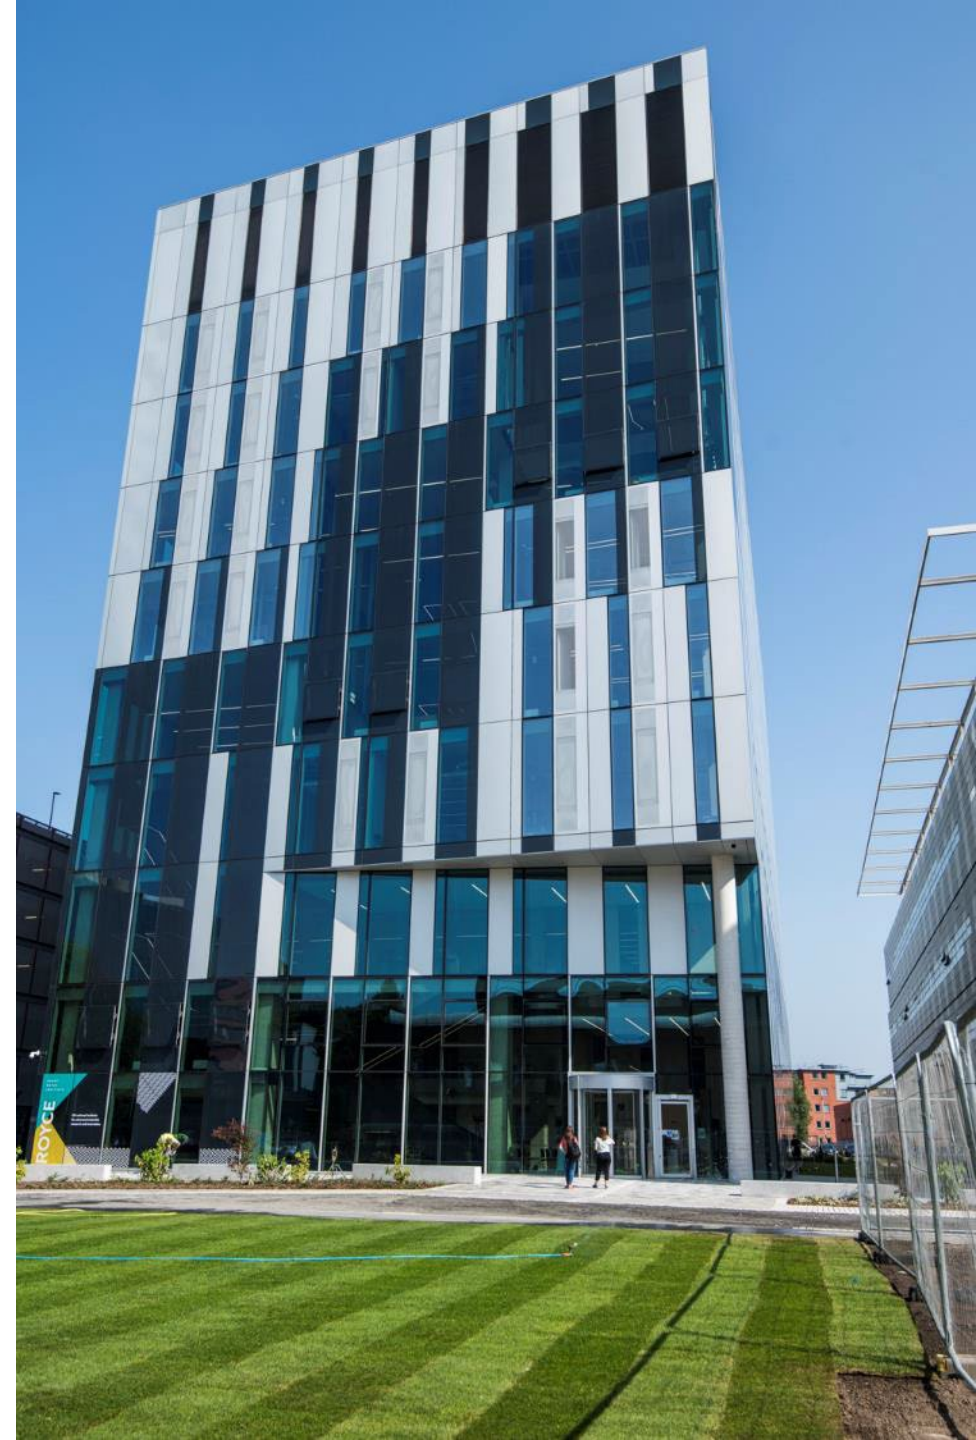

Demonstrating Impact

- Delivering fundamental research impacts including commercialisation
- Enabling research leadership and growth in capacity and capability in the ORE community
- Working with businesses to support adoption of research/knowledge to improve processes
- Supporting policy impacts, where expertise and knowledge have influenced policy development

Maximising leverage and outcomes

- Supporting the ORE community to harness existing and new partnerships – and respond to emerging opportunities and challenges
- Working with the ORE community to encourage co-investment and leverage: from government at all levels, businesses, other funders, research users

Bridging Interdisciplinarity

- Supporting bridging ORE communities between EPSRC and the remits of other research:

Bridging into NERC/environmental space, environmental impacts of technologies

Considerations of social aspects, public acceptability
